

Action point roundup

Nigel Titley

RIPE 57 Action points

- AP 57.2 [RIPE NCC] Cleanup of forward domain data

RIPE 60 Action points

- AP 60.2 [RIPE NCC] Think about what sort of trouble-shooting attributes might be useful and make proposals

RIPE 61 Action points

- AP 61.3 [DB-WG] Community to think about where we should go from here (after passwords) (SHA2?)

RIPE 62 Action points

- AP 62.1 [RIPE-NCC] Send a geolocation proposal to the mailing list to open up discussion
- AP 62.2 [RIPE-NCC] Examine the use of the sub-dom, dom-net, mnt-lower and nserver, discuss on the list and cleanup if agreement reached.

RIPE 62 Action points

- AP62.3 [RIPE NCC] Investigate how much effort it would take to create a TLS based whois service (including getting an official port assigned).
- AP62.4 [RIPE-NCC] Do some analysis on the relative numbers of objects secured by passwords.

RIPE 62 Action points

- AP62.5 [RIPE-NCC] Implement the dash-notation changes for reverse DNS as proposed on the mailing list
