

IPv6 Week

06 – 12 Feb 2012

www.ipv6week.org

cgi.br nic.br

Why

- IPv6 World Day was a success, but...
- People who participate asked for a more complete test:
 - More time, real traffic
- Some very important content providers in Brazil could not participate, because of lack of Internet transit from their upstreams.

Campus party

Initial support from...

What?

- A week!
- Content providers
 - As in the World IPv6 Day
- Datacenters, hosting providers
- ISPs
 - Trial with users
 - No specific % - best effort
- End Users
 - There will be some challenges with awards

World IPv6 Day/Week Jun2012/Jan2013

- **That's not us...**
- We are not competing, we are trying to add...
- We could not wait more for a definition.
- We will fully support it, and we will foster the participation in our region.

Your support

- We would like to have your support, specially if you have strong presence in our region
- Activate AAAA for regional (ccTLD) domains:
 - .br, .cl, .ar, .uy, etc...
- Activate AAAA worldwide...
 - It worked on World IPv6 Day, doesn't it?
Why not?
