Resources Request for Business Operations

Marco Hogewoning

RIPE NCC

RIPE NCC

Address Space for Business Processes

- The RIPE NCC would like to be able to sit in the customer seat

    - Testing the production environment

    - Verifying/replicating error conditions/bugs

    - Educational or demonstration purposes

- The RIPE NCC request therefor to have a "fake" LIR that mimics the average situation of regular members

- This benefits software development, but also customer services and training

Tuesday, November 1, 2011

Resource Request

- This "LIR" should have the following resources assigned:

  - /21 IPv4 PA Allocation

  - /32 IPv6 Allocation

  - 1 AS number (32 bit)

- This "LIR" will only exists technically and won't influence the billing algorithm calculation and is not a legal member

- Since this space will not be routed on the internet we can take a block that will be hard to use for others

- These blocks and their use will be documented and clearly marked a such in the RIPE Database
